As a dynamic developer with four years of experience, my expertise lies at the intersection of traditional and innovative software development. My journey spans from .NET development to modern no-code/low-code solutions, with a strong focus on front-end technologies like React. I'm passionate about creating intuitive, user-centric applications that combine aesthetic design with functional programming. My diverse skill set enables me to adapt quickly to evolving technological landscapes while delivering efficient and impactful software solutions.

EXPERIENCE

Neopric Inc., Saint John— Software Developer
April 2020- present

Specialized in traditional and modern software development approaches, leveraging a strong foundation in .NET principles. Led the development of interactive and responsive web applications using React, focusing on creating intuitive user interfaces and robust functionality. Key achievements include:

- Developed complex web applications by combining aesthetic design principles with functional programming
- Created responsive and visually appealing front-end solutions using React and modern web technologies
- Developed and maintained scalable solutions using .NET framework, ensuring high performance and code quality
- Implemented and customized websites to meet diverse client requirements
